Career Objective

MCA student with practical experience in **Full-Stack Development** and problem-solving using **Data Structures & Algorithms**. Built impactful academic projects to solve real-world challenges effectively and efficiently. Seeking a Software Developer role to apply technical skills, continuously learn, and contribute to building efficient, scalable, reliable, and high-quality software systems and applications.

Education

Master of Computer Applications (MCA) Graphic Era Deemed to be University, Dehradun	2025–2027 (Pursuing)
Bachelor of Computer Applications (BCA) M.S. College, Motihari	2022–2025 80.03%
Intermediate (12th – Science) BSEB, Patna	2020–2022 82.80%

Technical Skills

- **Languages:** C, C++, Java, JavaScript
- **Frontend:** HTML5, CSS3, React.js
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB, MySQL
- **Tools:** Git, GitHub, Postman, VS Code
- **Core:** Data Structures & Algorithms, DBMS, Operating Systems

Projects

Patient Scheduling Management System

- Developed a web-based system to manage patient appointments efficiently, reducing scheduling conflicts.
- Implemented features for booking, rescheduling, and canceling appointments with real-time updates.
- Designed an intuitive interface for both patients and administrators to improve usability.
- Enhanced system efficiency by organizing patient data and appointment records systematically.

MediPredict AI: Heart Disease Prediction System

- Built a machine learning-based system to predict the risk of heart disease using patient health data.
- Applied data preprocessing and classification algorithms to improve prediction accuracy.
- Developed a user-friendly interface to input medical parameters and display prediction results.
- Assisted in early detection and decision-making by providing reliable predictive insights.

Hotel Booking Management System

- Developed a full-stack web application for online hotel room booking and management.
- Implemented secure user authentication and booking management features.
- Designed modules for room availability tracking, booking confirmation, and cancellation.
- Improved user experience with a clean interface and efficient database handling.

Experience

Full-Stack Developer (Academic / Project-Based)

- Developed and deployed full-stack web applications using modern frontend and backend technologies.
- Designed and implemented RESTful APIs, authentication systems, and database integration.
- Applied Data Structures & Algorithms to solve real-world problems and optimize application performance.
- Worked across the complete development lifecycle including design, development, testing, debugging, and deployment.

Certifications

- **TBI Certificate**

Soft Skills

Problem Solving — Teamwork — Communication — Adaptability — Quick Learning
